

Cyber Security Engineer

Crawley, West Sussex, UK - Up to £60,000 (depending on skills) + Benefits

Your new company

We're a vibrant technology solutions provider delivering transformation projects across the UK. Our excellent reputation has built us a diverse user base that uses our solutions to engage their customers, inspire their teams and transform their businesses.

Our cyber security solutions are particularly well regarded and, as such, we're seeking engineers in this space with operational and technical expertise who will help to deliver a mature and robust information security solution set.

Your new role

You'll join a team of highly experienced IT professionals and will report directly to our Head of Services. You'll be tasked with developing new methods and technical solutions to effectively manage risk and defend against cyber-attacks. You will utilise your technical and governance knowledge to review and audit existing security processes and deliver our roadmap for implementing improved practices, policies and technical solutions. You'll interact with senior stakeholders daily with the unique opportunity to influence strategy across the entire client base.

What you'll need to succeed

As the successful candidate you'll display a real passion for technology and security. Your technical background will cover network or infrastructure engineering, including implementing and maintaining advanced security solutions – particularly the Fortinet security fabric and cloud security. Your knowledge in this space will be grown extensively in this role and we will support your development and learning. Knowledge and experience working with or implementing:

- identity & access management
- incident detection & response
- vulnerability management
- perimeter security technologies
- endpoint protection solutions
- network access control

will be advantageous and you will grow and learn in all these areas and more in this role.

What you'll get in return

You'll be rewarded with salary of up to £60,000 + benefits and the rare opportunity to work in a front-line cyber security role, facing unique challenges. You'll be supported by a closely-knit management team and cutting-edge systems and technology, based in beautiful offices with on-site parking in Crawley.

What you need to do now

If you're interested in this role, forward an up-to-date copy of your CV, or call us now. If this job isn't quite right for you but you are looking for a new position, please contact us for a confidential discussion on your career.
