

ADVANCED LAYER 7 SECURITY, THREAT PROTECTION, INTRUSION PREVENTION, WEB FILTERING AND APPLICATION CONTROL

Firewalls are a business essential as cyber threats continue to rise. Next generation firewalls offer superior protection for many reasons.

Incorporating the work of traditional firewalls, antiviruses and other security applications, NGFWs are able to block malware from ever entering a network.

Threats to mobile devices and larger networks are evolving daily. NGFWs protect companies from a broad spectrum of intrusions and advanced persistent threats (APTs).

THE ITHQ NEXT GENERATION FIREWALL (NGFW) SOLUTION

We deliver a fully configured and managed NGFW solution in partnership with Fortinet's FortiGate.

Our FIRE process: proven to maximise project results

FortiGate utilizes purpose-built security processors (SPUs) and threat intelligence security services from AI-powered FortiGuard labs, delivering advanced resilience including high performance inspection of clear-texted and encrypted traffic.

Additional automation and expertise make your business as protected as possible to ever-changing cyber threats.

Next Generation Firewalls (NGFWs)

Deployment and management of FortiGate NGFW

- **Intrusion prevention**
Protects against malware, exploits and malicious websites in encrypted and non-encrypted traffic
- **Consistent security across your network**
Enables Fortinet and Fabric-ready partners' products for broader visibility, integrated end-to-end detection, threat intelligence sharing and automated remediation
- **Application controls**
Identifies thousands of applications inside network traffic for deep inspection and granular policy enforcement
- **VPN capability**
Advanced networking, high-performance & scalable VPN capabilities
- **Web filtering**
Continuous threat intelligence from AI-powered FortiGuard Labs security services detects and protects against known and unknown attacks
- **Perimeter security**
Protecting your internal business-critical assets
- **Data centre & campus security**
Advanced threat management & intrusion prevention at the core of your network
- **Secure SD-WAN**
Delivers WAN Edge capabilities in a single offering for enterprise branches to improve user experience and lower cost without compromising security posture
- **Cloud security**
Consistent security, automation, and deep integrations for multi-cloud environments and support for top 7 Infrastructure-as-aService providers
- **Cloud on-ramp**
High-speed connectivity to multi-cloud environments accelerates the on-ramp to the cloud and provides SSL and TLS encrypted traffic inspection on-premises and in the cloud

"Best experience we have had with a firewall"

Gartner review: Analyst, Services Industry

FORTINET: TOP-RATED NETWORK FIREWALL ON GARTNER

Figure 1. Magic Quadrant for Network Firewalls

Our partner policy at ITHQ is: *only the best*

Fortinet's NGFW consistently features top-right on Gartner's Magic Quadrant for network firewalls.

It offers flexible deployment from the network edge to the core, data centre, internal segment and the Cloud.

By leveraging purpose-built security processors (SPUs), it delivers scalable performance of advanced security services such as threat protection, SSL inspection, and ultra low latency, for protecting internal segments and mission critical environments.

Managed by ITHQ, your NGFW solution will protect your entire business network from both known and unknown attacks.

ITHQ NGFW SOLUTION FEATURES

Comprehensive consultation, solution and reporting plan

Configuration and migration

SD-WAN cloud assist monitoring

Security services and rating

Application control

Cloud access security broker (CASB)

Anti-spam

Web filtering

Advanced malware protection

Intrusion prevention system (IPS)

Talent, technology and technique
applied to help your business
perform better
